STATUS OF CLAIMS

Claims 1 – 17 (Cancelled).

Claim 18. (Previously Presented) The method of soothing a mammal comprising administering to said mammal a personal care composition which comprises an effective amount of a sensory fragrance, wherein the personal care composition is capable of reducing the cortisol level of the mammal by about 0.1 to about 75 % and/or increasing the sIgA level of the mammal by about 10% to about 150%, wherein the personal care composition is a shampoo.

Claim 19. (Previously Presented) The method of soothing a mammal comprising administering to said mammal a personal care composition which comprises an effective amount of a sensory fragrance, wherein the personal care composition is capable of reducing the cortisol level of the mammal by about 0.1 to about 75 % and/or increasing the sIgA level of the mammal by about 10% to about 150%, wherein the personal care composition is a wash or bath.

Claim 20. (Previously Presented) The method of soothing a mammal comprising administering to said mammal a personal care composition which comprises an effective amount of a sensory fragrance, wherein the personal

care composition is capable of reducing the cortisol level of the mammal by about 0.1 to about 75 % and/or increasing the sIgA level of the mammal by about 10% to about 150%, wherein the personal care composition is a powder.

Claim 21. (Previously Presented)The method of soothing a mammal comprising administering to said mammal a personal care composition which comprises an effective amount of a sensory fragrance, wherein the personal care composition is capable of reducing the cortisol level of the mammal by about 0.1 to about 75 % and/or increasing the sIgA level of the mammal by about 10% to about 150%, wherein the personal care composition is a lotion.

Claim 22 (Previously Presented) The method of soothing a mammal comprising administering to said mammal a personal care composition which comprises an effective amount of a sensory fragrance, wherein the personal care composition is capable of reducing the cortisol level of the mammal by about 0.1 to about 75 % and/or increasing the sIgA level of the mammal by about 10% to about 150%, wherein the personal care composition is a wipe.

Claims 23 and 24 (cancelled).

Claim 25 (Previously Presented) The personal care composition comprising an effective amount of a sensory fragrance, wherein said sensory fragrance comprises one or more members of the group consisting of chamomile, rose, orange, tuberose, sandalwood, lavender, cedarwood, bergamot, and benzoin resin, and wherein the personal care composition is capable of reducing the cortisol level in a mammal by about 0.1 to about 75% and/or increasing the sIgA level in the human by about 10% to about 150%, and wherein the personal care composition is a shampoo.

Claim 26. (Previously Presented) The personal care composition comprising an effective amount of a sensory fragrance, wherein said sensory fragrance comprises one or more members of the group consisting of chamomile, rose, orange, tuberose, sandalwood, lavender, cedarwood, bergamot, and benzoin resin, and wherein the personal care composition is capable of reducing the cortisol level in a mammal by about 0.1 to about 75% and/or increasing the sIgA level in the human by about 10% to about 150%, and wherein the personal care composition is a wash or bath.

Claim 27 (Previously Presented) The personal care composition comprising an effective amount of a sensory fragrance, wherein said sensory fragrance comprises one or more members of the group consisting of chamomile, rose, orange, tuberose, sandalwood, lavender, cedarwood, bergamot, and benzoin resin, and wherein the personal care composition is capable of reducing the cortisol level in a mammal by about 0.1 to about 75% and/or increasing the sIgA level in the human by about 10% to about 150%, and wherein the personal care composition is a powder.

Claim 28. (Previously Presented) The personal care composition comprising an effective amount of a sensory fragrance, wherein said sensory fragrance comprises one or more members of the group consisting of chamomile, rose, orange, tuberose, sandalwood, lavender, cedarwood, bergamot, and benzoin resin, and wherein the personal care composition is capable of reducing the cortisol level in a mammal by about 0.1 to about 75% and/or increasing the sIgA level in the human by about 10% to about 150%, and wherein the personal care composition is a lotion.

Claim 29. (Previously Presented) The personal care composition comprising an effective amount of a sensory fragrance, wherein said sensory fragrance comprises one or more members of the group consisting of chamomile, rose, orange, tuberose, sandalwood, lavender, cedarwood, bergamot, and benzoin resin, and wherein the personal care composition is capable of reducing the cortisol level in a mammal by about 0.1 to about 75% and/or increasing the sIgA level in the human by about 10% to about 150%, and wherein the personal care composition is a wipe.

Claim 30. (Previously Presented) The method of claim 19 wherein the mammal is a child.

Claim 31. (Previously Presented) The method of claim 30 wherein the child is an infant of an age from about 1 day to about 2 years.

Claim 32. (Previously Presented) The method of claim 21 wherein the mammal is a child.

Claim 33. (Previously Presented) The method of claim 32 wherein the child is an infant of an age from about 1 day to about 2 years.

Claim 34. (Previously Presented) The personal care composition of claim 26 wherein the mammal is a child.

Claim 35. (Previously Presented) The personal care composition of claim 34 wherein the child is an infant of an age from about 1 day to about 2 years.

Claim 36. (Previously Presented) The personal care composition of claim 28 wherein the mammal is a child.

Claim 37. (Previously Presented) The personal care composition of claim 36 wherein the child is an infant of an age from about 1 day to about 2 years.

Claim 38 (New) A method of soothing a mammal comprising administering to said mammal a personal care composition which comprises an effective amount of a sensory fragrance, wherein the sensory fragrance is comprised of, based upon the total weight of the sensory fragrance, from about 0.1% to about 8% of an essential oil portion and from about 92% to about 99.9% of an odoriferous portion, wherein the essential oil portion is comprised of, based upon the total weight of the sensory fragrance, from about 0.05% to about 5% chamomile and about 0.01% to about 30% lavender, and wherein the personal care composition is capable of reducing the cortisol level of the mammal by about 0.1 % to about 75% and/or increasing the sIgA level of the mammal by about 10% to about 150%.

Claim 39 (New) The method of claim 38 wherein the essential oil portion is comprised of, based upon the total weight of the sensory fragrance, from about 0.05% to about 2% chamomile and about 0.01% to about 10% lavender.

Claim 40 (New) The method of claim 38 wherein the personal care composition is a bath or wash.

Claim 41 (New) The method of claim 38 wherein the personal care composition is a wipe.

Claim 42 (New) The method of claim 38 wherein the personal care composition is a lotion.

Claim 43 (New) The method of claim 38 wherein the personal care composition is a powder.

Claim 44 (New) The method of claim 38 wherein the personal care composition is a powder.

Claim 45 (New) The method of claim 38 wherein the personal care composition is a shampoo.
